AT A GLANCE

Auto grind, dose and tamp

Straight into a professional 58mm portafilter, with Baratza burrs and 45 grind settings.

Auto MilQ™ and Auto Queue

Hands-free microfoam, and the milk starts by itself the moment extraction finishes.

Barista Guidance

Detects an over or under extracted shot and tells you which way to move the grind.

ThermoJet® heating

Optimum extraction temperature in seconds, using up to 32% less energy.

AUTOMATION, WITHOUT LOSING THE COFFEE

Auto grind, dose and tamp into a professional-style 58mm portafilter, then let Barista Guidance help you dial the grind in. Auto MilQ™ delivers silky microfoam hands-free and Auto Queue starts the milk the moment your shot finishes. The new touch screen carries pre-programmed café favourites including Cold Brew and Cold Espresso, and the whole machine is up to temperature in seconds on ThermoJet®.

Automatic where it saves you time, adjustable where it changes the cup.

- **Third wave specialty coffee at home**

  Built around the 4 keys formula used in professional cafés: the right dose of freshly ground beans, precise temperature control, optimal water pressure and true microfoam milk for latte art.

- **Auto grind, dose and tamp**

  A fully integrated high-carbon hardened steel Baratza® precision burr grinder with 45 settings grinds, doses and tamps for you, straight into the portafilter.

- **Professional 58mm portafilter, 22 g dose**

  The same commercial-style 58mm portafilter and 22 g dose used on the Oracle Dual Boiler, giving full-bodied espresso with real depth and complexity.

- **Barista Guidance and Auto Queue**

  The machine detects an over or under extracted shot and tells you how to adjust the grind. Auto Queue then hands over automatically, steaming the milk as soon as extraction finishes.

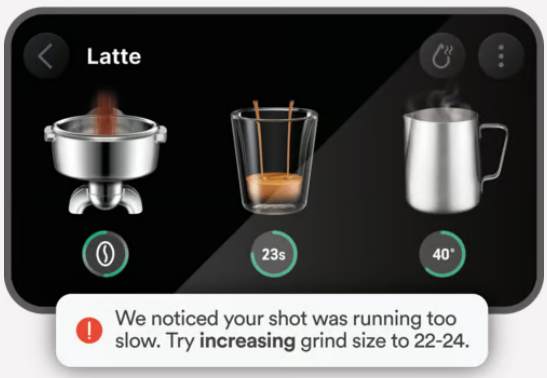
- **ThermoJet® heating and heated group head**

  A digitally printed heating circuit reaches optimum extraction temperature in seconds, and the heated group head can be trimmed in single-degree steps to suit your taste.

Café speed, without the café

Cold Brew and Cold Espresso built in, on a screen four times richer than before. See it running on Sheikh Zayed Road.

WHERE THE JET EARNS ITS NAME



Barista Guidance

It reads the pour, spots an over or under extraction, and tells you which way to move the grind. Dialling in stops being guesswork.

Auto Queue

Queue the next step and the machine handles the handover — milk starts steaming the moment the shot finishes.

AVAILABLE FINISHES

Brushed Stainless Steel

SES985BSS4GUK1

The classic specialty-bar look, and the volume seller across the Sage range.

Black Truffle

SES985BTR4GUK1

Matte black, and the only finish that ships with the drip tray guard.

One difference worth knowing

The two finishes are mechanically identical, but Sage includes the drip tray guard only with Black Truffle. It is a small accessory and it protects the tray from cup marks, so it is worth factoring in if you are weighing the two against each other.

- Identical specification and price
- Same two-year warranty on both
- Both finishes running in the showroom

TECHNICAL SPECIFICATIONS

Model number	SES985BSS4GUK1
Finish	Brushed Stainless Steel
Heating system	ThermoJet®, up to temperature in seconds
Group head	ThermoJet® heated, ±1°C adjustment
Energy	Up to 32% less than a Thermoblock
